PROFILE

I run Substrate Systems, where I've built Q, Exomem, and Endstate from concept through architecture, implementation, and production operations. My work spans backend systems, integrations, AI infrastructure, and product development. Alongside that, I work on Yolo Group's BMP Finance team, having previously led integrations at Hub88.

CORE STACK

Elixir TypeScript Python PHP React Node.js Next.js PostgreSQL
pgvector Redis Elasticsearch Docker IaC FastAPI Langfuse AppSignal

PRODUCTS — SUBSTRATE SYSTEMS

Exomem — *User-owned knowledge and epistemic governance*

Built a digital knowledge system for sources, evidence, and conclusions, preserving provenance and epistemic status. User-owned Markdown and Obsidian vaults, with hybrid retrieval and governed recall and capture for AI agents through MCP. Python; published on PyPI and Docker.

substratesystems.io/exomem · github.com/Artexis10/exomem

Q — *Creator operating system*

Building a creator operating system connecting content, audience intelligence, and publishing. Searchable media and audience evidence inform creator-guided drafts; social workflows and outcome analytics close the feedback loop. Python/FastAPI, Next.js, PostgreSQL/pgvector.

useq.ai

Endstate — *Windows setup and restore tool*

Captures installed apps and settings, then restores them on a fresh Windows machine. Open-source Go engine and desktop GUI. Endstate Cloud backs up client-encrypted data; the server cannot decrypt it.

EXPERIENCE

Founder & Software Architect

Dec 2025 – Present

[Substrate Systems OÜ](#) · Tallinn / Remote

Own product architecture, engineering, and production operations from concept through release.

Software Engineer

Mar 2024 – Present

[Yolo Group — BMP Finance](#) · Tallinn

BMP Finance since Aug 2026; previously Hub88 Core and Integrations. At Hub88, led five integrations, built adapters from scratch and contributed to dozens, covering supplier and operator APIs in Elixir. Led production AI governance; published three-condition benchmark: skill-triggered contract loading 9–9.5/10, baseline 7/10.

Software Developer

Apr 2022 – Feb 2024

[Bedford Row Capital](#) · Tallinn

Primary developer alongside the team lead on a structured debt and securitisation platform. Built loan-notes servicing end-to-end in PHP: frontend, backend, and API.

ADDITIONAL

Languages English (native), Estonian (native), Spanish (A1–A2), Italian (basic)

Podcast Co-host and technical operator — Together, Unprocessed
