PROFILE

I run Substrate Systems, taking Q, Exomem, and Endstate from concept to production. My work spans architecture, backend systems, integrations, AI infrastructure, and product development. I also work on Yolo Group's BMP Finance team, having previously led integrations at Hub88.

CORE STACK

Python TypeScript Elixir FastAPI Next.js PostgreSQL pgvector Docker
Kubernetes (K3s) Terraform / IaC Ansible MCP RAG Knowledge graphs
LLM evals Agentic AI Langfuse

PRODUCTS — SUBSTRATE SYSTEMS

Q — *Creator operating system*

Building a creator operating system for content, audience intelligence, and publishing. Searchable media and audience evidence inform creator-guided drafts; social workflows and outcome analytics close the loop.

useq.ai

Exomem — *User-owned knowledge and epistemic governance*

Built a digital knowledge system for sources, evidence, and conclusions, preserving provenance and epistemic status. User-owned Markdown and Obsidian vaults, with hybrid retrieval and governed recall and capture for AI agents through MCP. Python; published on PyPI and Docker.

substratesystems.io/exomem · github.com/Artexis10/exomem

Endstate — *Windows setup and restore tool*

Captures installed apps and settings, then restores them on a fresh Windows machine. Open-source Go engine and desktop GUI. Endstate Cloud backs up client-encrypted data; the server cannot decrypt it.

EXPERIENCE

Founder & Software Architect

Dec 2025 – Present

[Substrate Systems OÜ](https://substratesystems.io) · Tallinn / Remote

Own product architecture, engineering, and production operations from concept through release.

Software Engineer

Mar 2024 – Present

[Yolo Group — BMP Finance](https://yologroup.com) · Tallinn

BMP Finance since Aug 2026; previously Hub88 Core and Integrations. At Hub88, led five integrations, built adapters from scratch and contributed to dozens, covering supplier and operator APIs in Elixir. Led production AI governance; published three-condition benchmark: skill-triggered contract loading 9–9.5/10, baseline 7/10.

Software Developer

Apr 2022 – Feb 2024

[Bedford Row Capital](https://bedfordrowcapital.com) · Tallinn

Primary developer alongside the team lead on a structured debt and securitisation platform. Built loan-notes servicing end-to-end in PHP: frontend, backend, and API.
