PROFILE

I'm a software engineer on Yolo Group's BMP Finance team. I previously led integrations at Hub88. I also build Q, Exomem, and Endstate through Substrate Systems, taking each from an idea to a working product.

CORE STACK

Elixir TypeScript Python PHP React Node.js Next.js PostgreSQL
pgvector Redis Elasticsearch Docker IaC FastAPI Langfuse AppSignal

PRODUCTS — SUBSTRATE SYSTEMS

Exomem — User-owned knowledge and epistemic governance

Built a digital knowledge system for sources, evidence, and conclusions, preserving provenance and epistemic status. User-owned Markdown and Obsidian vaults, with hybrid retrieval and governed recall and capture for AI agents through MCP. Python; published on PyPI and Docker.

substratesystems.io/exomem · github.com/Artexis10/exomem

Q — Creator operating system

Building a creator operating system connecting content, audience intelligence, and publishing. Searchable media and audience evidence inform creator-guided drafts; social workflows and outcome analytics close the feedback loop. Python/FastAPI, Next.js, PostgreSQL/pgvector.

useq.ai

Endstate — Windows setup and restore tool

Captures installed apps and settings, then restores them on a fresh Windows machine. Open-source Go engine and desktop GUI. Endstate Cloud backs up client-encrypted data; the server cannot decrypt it.

EXPERIENCE

Software Engineer

Mar 2024 – Present

[Yolo Group — BMP Finance](#) · Tallinn

BMP Finance since Aug 2026; Hub88 Core and Integrations before that. At Hub88, led five integrations, built adapters from scratch, and contributed to dozens; supplier and operator-facing APIs in Elixir. Led the AI governance initiative used in production; a published three-condition benchmark scored skill-triggered contract loading 9–9.5/10 against a 7/10 baseline.

Software Developer

Apr 2022 – Feb 2024

[Bedford Row Capital](#) · Tallinn

Primary developer alongside the team lead on a structured debt and securitisation platform. Built a loan-notes servicing application end-to-end in PHP, including the frontend, backend, and API.

ADDITIONAL

Languages English (native), Estonian (native), Spanish (A1–A2), Italian (basic)

Podcast Co-host and technical operator — Together, Unprocessed

Contracting B2B via Substrate Systems OÜ (reg. 17394552)
