PROFILE

I encode business invariants into versioned contract docs so AI-augmented teams ship without human re-review at every step — a governance framework now in production at Hub88, an iGaming aggregator processing hundreds of millions of daily transactions across many providers and operators. Project lead on four integrations + one in progress. Independently shipped Q (AI knowledge platform, ~500 testers) and Endstate (Windows setup restore tool). Available remote, B2B via Substrate Systems OÜ.

CORE STACK

Elixir Go TypeScript Python React Node.js Next.js PostgreSQL
Elasticsearch Kibana RabbitMQ Docker FastAPI RAG Embeddings

PRODUCTS — SUBSTRATE SYSTEMS

LLM Governance — *Contract-based AI development framework*

Business invariants encoded in versioned contract docs, connected via skills that load and reference them at runtime to enforce behavior across AI-assisted development. RFC authored, now in production use at Hub88. substratesystems.io/blog/governance-as-compression

Q — *AI knowledge infrastructure platform*

Turns content libraries into branded AI knowledge bases with semantic retrieval and multi-tenant isolation. ~500 active testers. Python, FastAPI, PostgreSQL, vector search. useq.ai

Endstate — *Windows setup restore tool*

Restore your machine setup from your old machine. Captures installed apps and settings into a portable file; replays on a fresh install. Open-source engine (Go), free desktop GUI, paid hosted backup service. substratesystems.io · github.com/Artexis10/endstate

EXPERIENCE

Software Engineer

Mar 2024 – Present

[Yolo Group — Hub88 Integration Team](#) · Tallinn

Project lead on four integrations + one in progress on a high-traffic B2B platform processing hundreds of millions of daily transactions across many providers and operators. Built several integration adapters from scratch and contributed to dozens across the platform. Senior specialist on core integration system. Led AI governance initiative now in production (RFC + PR demos). Fault-tolerant third-party integrations, platform architecture. Promoted from junior Jun 2025. Elixir, PostgreSQL, Docker, Elasticsearch, Kibana, RabbitMQ.

Software Engineer

Apr 2022 – Feb 2024

[Bedford Row Capital](#) · Tallinn

Proprietary platform for structured debt issuance and securitisation — transaction mechanics, servicing, document handling. Primary developer alongside team lead. Full-stack, microservices, infrastructure.

ADDITIONAL

Languages English (native), Estonian (native), Spanish (A1–A2), Italian (basic)

Podcast Co-host & technical operator — Together, Unprocessed (~8–12M monthly Facebook views, 104K followers; 11K Instagram); scientific reasoning across metabolism, biochemistry, longevity, and performance

Contracting B2B via Substrate Systems OÜ (reg. 17394552)
