PROFILE

I lead integrations at Hub88, an Elixir iGaming aggregator, and take on independent engineering work through Substrate Systems. I've also shipped Q, Exomem, and Endstate, taking each from an idea to a working product.

CORE STACK

Elixir TypeScript Python PHP React Node.js Next.js PostgreSQL
pgvector Redis Elasticsearch Docker IaC FastAPI Langfuse AppSignal

PRODUCTS — SUBSTRATE SYSTEMS

Exomem — Governed memory for AI agents

Built an MCP memory server over user-owned Markdown and Obsidian vaults. Hybrid retrieval with source provenance and audience-based disclosure controls. Python; published on PyPI and Docker.

substratesystems.io/exomem · github.com/Artexis10/exomem

Q — Creator intelligence and content platform

Built a creator platform connecting a searchable media library to Ghostwriter, social automations, and audience intelligence. Creator feedback guides drafts; analytics and source-linked audience evidence inform what to make next. Python/FastAPI, Next.js, PostgreSQL/pgvector.

useq.ai

Endstate — Windows setup and restore tool

Captures installed apps and settings, then restores them on a fresh Windows machine. Open-source Go engine and desktop GUI. Endstate Cloud backs up client-encrypted data; the server cannot decrypt it.

EXPERIENCE

Independent Software Engineer

Jul 2026 – Present

[Substrate Systems OÜ](#) · Remote

Independent product engineering, working directly with a founder. Backend and API development, integrations, testing, and deployment; responsible for technical architecture and delivery.

Software Engineer

Mar 2024 – Present

[Yolo Group — Hub88 Core and Integrations](#) · Tallinn

Project lead on five integrations; built adapters from scratch and contributed to dozens. Supplier and operator-facing APIs in Elixir. Led the AI governance initiative used in production; a published three-condition benchmark scored skill-triggered contract loading 9–9.5/10 against a 7/10 baseline.

Software Developer

Apr 2022 – Feb 2024

[Bedford Row Capital](#) · Tallinn

Primary developer alongside the team lead on a structured debt and securitisation platform. Built a loan-notes servicing application end-to-end in PHP, including the frontend, backend, and API.

ADDITIONAL

Languages English (native), Estonian (native), Spanish (A1–A2), Italian (basic)

Podcast Co-host and technical operator — Together, Unprocessed

Contracting B2B via Substrate Systems OÜ (reg. 17394552)
